

Óxido superficial

The diagram shows a cross-section of a material. At the top is a yellow rectangular layer labeled 'Óxido superficial'. Below this is a light gray rectangular area. Within this gray area, there is a smaller orange rectangular layer labeled 'Zona sensible'. Below the orange layer is a horizontal double-headed arrow spanning the width of the orange layer, with the label '4μm' centered underneath it. At the bottom of the diagram is a large light gray rectangular area labeled 'Sustrato'.
